

FRASER

SCULPTURE PROGRAM

The Town of Fraser and the Public Arts Committee (PAC) is proud to welcome our first three sculptures to be in our sculpture walk program. The purpose of developing a sculpture placement program is to create greater awareness of the Arts in Fraser as well as foster economic development through the Arts.

As a small town, Fraser has already amassed a sizable collection of outdoor public art (sculpture). This new program's intent is to complement and update that collection.

With meeting our first year goal and based upon an evaluation of the first year program's success, we will continue to expand the number of collections throughout the Fraser community. Every year we will do a call-for-submissions with the PAC's 10-year goal to collect up to 30 sculptures. Some will become permanent placements while others will be for sale and on display for a year.

If you or anyone you know is interested in purchasing, contributing (in anyway) or displaying your work please contact:
