Re: Well Equipping – Well 1 and 3B

Dear Adam,

Per your request, Colorado Water Well is pleased to provide this proposal to provide, install, start up and test permanent pumping equipment in Well No. 1 and Well no. 3B.

Per our understanding the following scope of work is anticipated along with pricing:

1. Mobilize / Demobilize all equipment and tools (three mobilizations), and per diem.  
Lump Sum - \$1,380.00
2. Install new equipment into both wells, with customer supplied water level transducer.  
Lump Sum - \$1,800.00
3. Well equipment for both wells will include:
  1. New Stainless Steel Grundfos Submersible Motor
  2. New Grundfos Stainless Steel Pumps
  3. PVC Column Pipe (Certa-Lok 3” on Well No. 1 and 2” PVC with Stainless steel couplings on Well No. 3
  4. New check valves (3” check valve with knock out on Well No. 1 and 2” check valve on Well No. 3)
  5. New downhole submersible pump cable
  6. New 1” flush threaded PVC piezometer pipe for transducer installation
  7. Transition couplings, splice, banding, tape and miscellaneous supplies.  
Well No. 1 – Lump Sum – \$9,884.00  
Well No. 3 – Lump Sum – \$3,450.00

4. Start up, Test and provide completion information to Fraser and the Colorado Division of Water Resources.

Lump Sum - \$1,400.00

Total This Proposal - \$17,914.00

The materials are in stock and we can schedule installation within 2 weeks of notice to proceed, depending on weather and site access. We are looking forward to working with you on this important project.

Please call me with any questions or comments.

Sincerely,

Accepted By:

Tom Dea
